

CONTENTS

1. Introduction	5
2. Beliefs about Immunisation	6
3. Responding to Concerns	7
4. Myths and Concerns about Immunisation	9
Vaccine Manufacture and Testing	9
1. ‘Vaccines are unsafe’	9
2. ‘Vaccines are not adequately tested’	10
3. ‘Vaccines contain foreign proteins’	11
4. ‘Vaccines are contaminated with foreign viruses’	11
5. ‘Vaccines contain toxic additives’	12
6. ‘Vaccines are cultured on cell lines from aborted fetuses’	13
Immune System	14
1. ‘Vaccines weaken or overwhelm the immune system’	14
2. ‘Immunisation is unnatural’	14
3. ‘Specific immunity is not important for protection from disease’	15
4. ‘Homoeopathic preparations are an alternative to conventional vaccines’ ..	15
5. ‘Vaccines cause or worsen asthma and allergies’	16
Need for Vaccination	17
1. ‘Infectious diseases are not serious’	17
2. ‘Improved living standards, not immunisation, have reduced	18
infectious diseases’	
3. ‘Diseases are virtually eliminated so vaccination is not needed’	19
4. ‘Vaccines cause or spread the diseases they are supposed to prevent’	20
5. ‘Many cases of disease for which vaccines are given occur among the.....	20
vaccinated’	
6. ‘Some people have objections to vaccines based on religious beliefs’	21
Safety Concerns: General	22
1. ‘Mercury in vaccines can cause autism’	22
2. ‘Vaccines can cause diabetes’	23

3. 'Vaccines cause cancer'	23
4. 'Vaccines cause mad cow disease'	24
5. 'Vaccines are linked to Guillain-Barré syndrome'	25
6. 'Vaccines cause sudden infant death syndrome'	26
7. 'Vaccines cause shaken baby syndrome'	26
Safety Concerns: Specific Vaccines	27
1. 'MMR vaccine causes autism and inflammatory bowel disease (IBD)'	27
2. 'Pertussis vaccine causes brain damage'	28
3. 'Polio vaccines cause HIV/AIDS'	28
4. 'Hepatitis B vaccine causes multiple sclerosis'	29
5. 'Flu vaccines cause the flu'	29
6. 'HPV vaccines are unsafe and cause infertility or problems with pregnancy'	30
5. The Realities: Diseases Preventable by Vaccines	33
1. Diphtheria	33
2. <i>Haemophilus influenzae</i> type b (Hib)	34
3. Hepatitis A	35
4. Hepatitis B	36
5. Human papillomavirus (HPV)	36
6. Influenza ('flu')	37
7. Measles	38
8. Meningococcal disease	40
9. Mumps	40
10. Pertussis ('whooping cough')	40
11. Pneumococcal disease	42
12. Poliomyelitis ('polio')	44
13. Rotavirus	45
14. Rubella	46
15. Tetanus	47
16. Varicella ('chickenpox')	48
Deaths from vaccine-preventable diseases	49
6. The Realities: Vaccines	51
Vaccine Composition	51
1. Bacteria and viruses	51
2. Additives	52
3. Remnants from manufacturing	53
7. Appendix	55
Abbreviations	56

List of Figures

Figure 1:	Diphtheria notifications, Australia, 1917–2005	34
Figure 2:	<i>Haemophilus influenzae</i> type b (Hib) notifications, Australia, 1991–2006	35
Figure 3:	Hepatitis A notifications, Australia, 1991–2006	36
Figure 4:	Influenza notification rates 2003–2005 and hospitalisation rates 2002/03–2004/05, Australia, by age group.....	38
Figure 5:	Measles notifications, Australia, 1996–2006	39
Figure 6:	Pertussis notifications, Australia, 1996–2005.....	41
Figure 7:	Pneumococcal disease notifications, Australia, 2002–2005, by age group.....	43
Figure 8:	Polio notifications, Australia, 1917–2005.....	45
Figure 9:	Rubella notifications, Australia, 1992–2005.....	47
Figure 10:	Tetanus notifications, Australia, 1917–2005	48
Figure 11:	Deaths in Australia from diphtheria, pertussis, tetanus, polio and measles, 1956–2003.....	51
